One of the grand points of this new bush bean is in the rich green pods, which are of an enormous size, broad, thick, very long, uniform in shape, meaty and of high quality, absolutely stringless and free from any tough lining, not only when young, but this tender quality is retained to maturity. **A  
Very  
Heavy  
Oat.**

**One of the Big Yielding Oats**

**New Tree Oats**

These Oats are what the average farmer is looking for; they grow on all sides of the stalk and are very bushy, which makes them very large yielders. Straw grows often 5 feet high and is very stiff and extra good to sow with Peas and Vetches, they will not lodge or get down like many other varieties and therefore are especially good on that account. They will yield nearly as well as our Highland Oats and weigh from 35 to 40 pounds per measured bushel.

We would like all farmers to change their seed and try these oats, and we are sure you will give us a good report next fall. Our crop is very large, therefore we are offering them at a very low price. They are very clean and free from rust and are of a rich color.

Packets of 2 ozs, 10c., lb. 25c., 3 lbs. 60c., postpaid. By express or freight, pk. 35c., 1/2 bu. 60c., bu. \$1.00, 10 bu. \$9.50. Special prices on larger orders. Bags free.

**New  
Tree Oats**

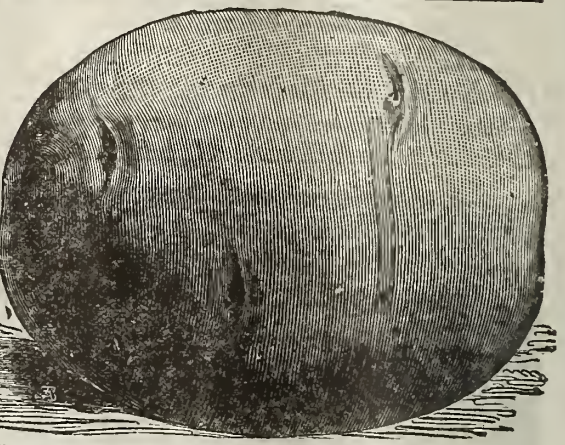

**HIGHLAND OATS**

The reports that we have received on the Oats that we have sold for the last few years has more than repaid us for the time and money spent in introducing them to the farmers of the United States. The Highland Oat is one of the new seeds of great merit which far surpasses anything we know of in the Oat line. The straw is very long and stiff, growing from four to six feet high, often running a head of more than a foot in length and known as the Horse Mane Oats with a peculiar stalk that makes it strong and excellent for fodder. The grain is short and of a bright yellow color when ripe, with very thin hulls, and we have them this year running from 70 to 80 bushels per acre. We are the only seed house that has this stock. We have raised oats for more than 25 years and fail to find anything that will equal them under all conditions. Many letters have been received of the wonderful yields and the satisfaction given therefore we are compelled to offer them this year.

Prices as follows:—Pkt. 6c., lb. 30c., 3 lbs. 70c., postpaid. By express or freight, peck 40c., 1/2 bu. 75c., bu. \$1.40, 2 bu. \$2.60, 5 bu. \$6.50, 10 bu. \$12.00. (32 lbs. to bu.) Special prices on large orders. Sacks free.

Its strong growth, earliness, uniformity, large yield and very handsome appearance have brought the Early Irish Cobbler to the front as a profitable variety for the market and home use. Our stock is very fine, having been grown on rich sandy soil, and is therefore free from scab. For an early potato you should try no other. **Ireland Black Oats**

**112 BU'S PER ACRE FIRST SUMMER**

These wonderful Black Bush Oats were grown on a farm near the town of Killylea, Amagh County, Ireland, with the enormous yield of several acres in the field.

We have had several requests for Black Oats during the past few years, that we started a search for something good to offer our customers, and believe we have found them at last. These oats are very strong, stocky growers, with a good stiff straw and heavy heads and from several tests we believe they will do exceptionally well on most any soil and in any State where oats can be grown successfully.

We are sure that no better Black Oat has ever been offered the American Farmer.

Owing to the high cost of this Black Oat and cost of getting it to this country, we only secured enough for a few acres last season to get a start, and we offer them in small lots only, and no more than 5 bus. to one customer.

We want every farmer to try a few this season and if satisfactory we can supply what you wish next season. Special price of pkt. 10c., 1/2 lb. 15c., 1 lb. 25c., lb. 40c., postpaid by mail. By express or freight, peck \$1.00, 1/2 bu. \$1.80, bu. \$3.25, not prepaid.

Our Giant Crimson Rhubarb is one of the greatest and most valuable Novelties we have ever offered. It is the earliest of all Rhubarb, and fit for use, not only in the spring, but all through the summer and fall, while common sorts are fit to use only a few weeks in spring. Stalks are of medium size, of good length, about one inch in diameter, of beautiful crimson color, the quality being simply superb, fully equal to the finest berries for sauce or pies and is really a combination of fruit and vegetable. The skin is so thin and tender it is not necessary to remove it and when cooked is a beautiful crimson sauce. It is especially adapted for forcing in greenhouses or cold frames. It will stand frosts which will destroy any other sort. Rhubarb is the first vegetable we have from the ground in spring and it is the easiest plant of all the perennials to grow.

The heads grow similar to Broom Corn forming large heads of round, plump white seed. It is an excellent feed for horses and cattle, and for chickens it is simply unexcelled. When ground it makes excellent flour for pancakes; besides it can be popped as popcorn, as it has a good flavor and is tender and crisp. It is more of a grain corn than forage, forming double the seed of Kafir Corn and more than any Cane or Sorgum plant.

### A Unique Novelty

Tomat. Pepper

### MAMMOTH PEANUTS

Peanuts can be successfully grown in almost any place where corn succeeds. This variety contains earliness and large size, is also very prolific, as is shown by the engraving from photo. Every part is useful; the vines as valuable feed for horses, cattle and sheep; producing from one to two tons of vines per acre, while the nuts contain a large per cent of rich nourishment. They do best on a light sandy soil, but will produce a good crop on any open soil when it is plowed deep and carefully tilled. Plant them in rows 2½ to 3 feet apart and from 9 to 12 inches in the row, under about 2 inches of dirt. If you grow a crop of peanuts you will also find that your soil has been benefited nearly as much as if sown to clover. We encourage everyone to try a crop of peanuts, even if only grown for home use.

Brazilian or Stooling Flour Corn

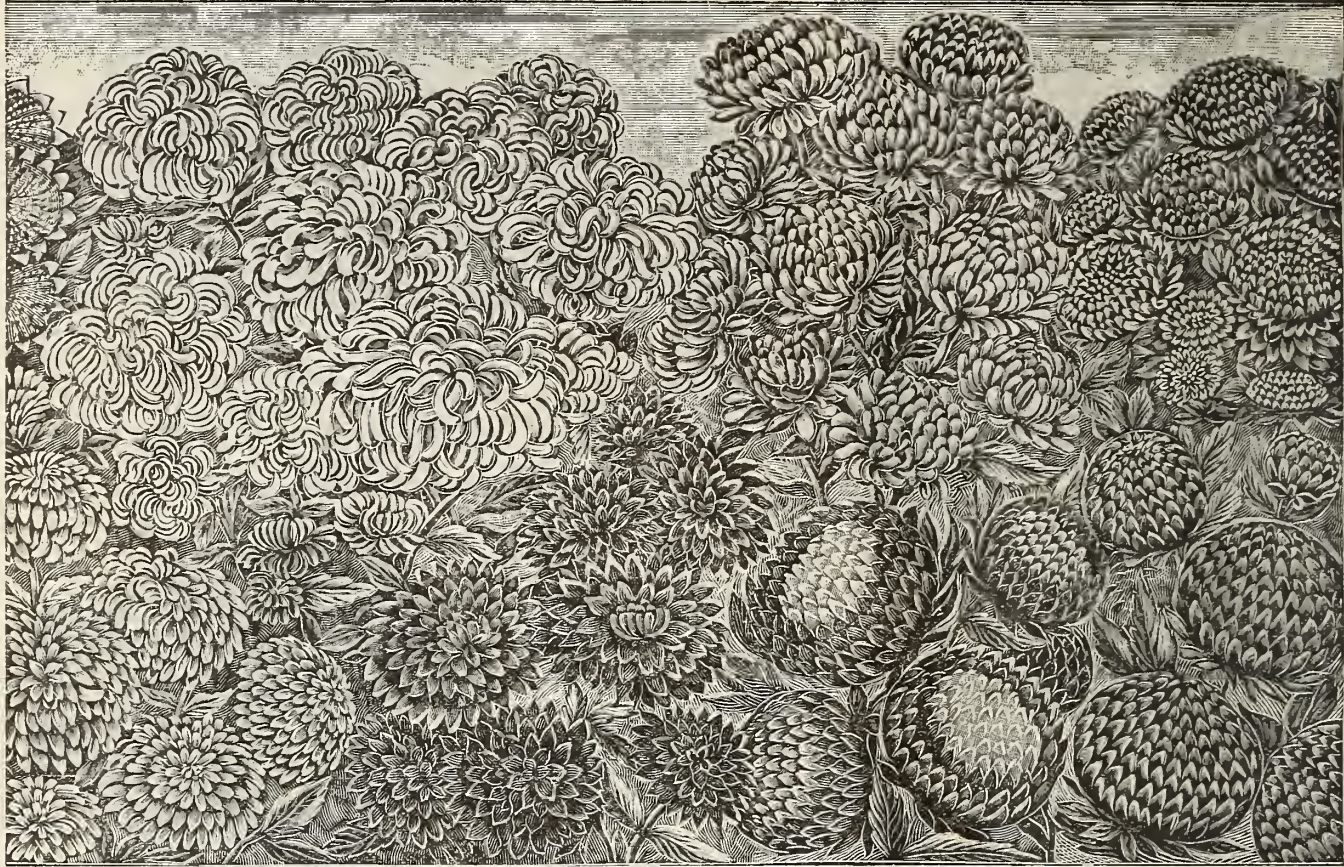

stalk, about 5 to 6 inches in circumference and from 9 to 12 inches in length of pure white kernels. It is the best variety for ensilage. It contains a larger per centage of starch than any other corn, and when ground and bolted by the same process as wheat, gives a better bread and biscuit flour than can be made from wheat. It is also used largely as roasting ears. Only two kernels should be planted to the hill, and afterward thinned to one and cultivate the same as other corn.
